

<i>ELECTRIC VEHICLE INFORMATION</i>		TROY FIRE DEPT. TRAINING BULLETIN 304.001	
<i>Issued</i>	<i>06/14</i>		<i>Page 1 of 1</i>

Purpose & Intent

In the search for more fuel-efficient, environmentally vehicles, the auto manufacturer has developed full electric and hybrid vehicles for use by consumers. These vehicles are becoming more numerous every day. As the technology advances, our tactics have to stay up with the current tech.

Here is a link to many documents that detail specific hybrid and electric vehicles:

[Electric Vehicles](\\PARMALEE\FD_Station\Station Resource Directory\Electric Vehicles) \\PARMALEE\FD_Station\Station Resource Directory\Electric Vehicles

This link will connect you to the directory that holds the documents. If you click on the top of the 1st column, all files will sort alphabetically. If you click on the top of the 2nd column, all files will sort by date modified (added).

As we become aware of changes in the technology, or if the documentation changes and we are provided a copy, the documentation will be updated.
