

<i>EXTRACTOR RESCUE BLADE</i>		TROY FIRE DEPT. TRAINING BULLETIN 305.003		
<i>Issued</i>	<i>09/13</i>	<i>Reviewed</i>	<i>08/14</i>	<i>Page 1 of 1</i>

The Stihl K-12 saw blade has been changed to the Extractor Rescue Blade. This blade can cut many different materials such as metal, glass, wood, concrete block, and more.

The purpose of this blade is to be able to cut multiple surfaces well without having to change blades. This blade was field-tested and it performed well.

The Extractor blade should be kept on the saw for immediate deployment. The assortment of other blades should be kept on the apparatus for use as necessary.

Videos showing the blade in action may be viewed at:
